SEED & FEED

Now is the time to set up your lawn and garden for success this summer by providing nutrients and seeds while getting rid of dead grass and unwanted growth.

REMOVE LOOSE LEAVES

Remove loose leaves, sand, pinecones and other debris so they don't affect grass growth. Clear off surfaces with a handheld blower or paddle.

MOW LAWNS

Mow lawns as needed based on rain, weather and type of grass. The preferred grass length is about 2-3 inches in height to maintain a healthy lawn.

TRIM WEEDS

String trimmer hard-to-reach areas to help hinder weed growth and improve appearance. Hold trimmers parallel to and a few inches off the ground while using a side-to-side motion.

56V Chainsaw

PRUNE TREES

Prune trees to eliminate overgrowth and for safety. Pruning in spring makes it easier to see what needs trimming. Spring trimming can help fresh cuts seal as new growth emerges. Use hand tools or a chain-saw to remove dead or diseased areas.

TRIM HEDGES & BUSHES

Trim hedges and bushes as needed. Some require it before seasonal growth and others after flowering. Hedge trimmers help provide a manicured look whenever trimming is appropriate.

TILL GARDEN BEDS & EDGE BORDERS

Till garden beds before planting seeds. For best results, be sure soil is mostly dry and crumbly, so it doesn't stick to tools. Now is the time to set up your lawn and garden for success this summer by providing nutrients and seeds while getting rid of dead grass and unwanted growth.
