4. Push out upper frame harness clips. Remove and discard harness.

**NOTE**

When harness is properly installed the shoulder curve will be oriented to the outside with ECHO logo visible as shown.

5. Insert upper frame harness clips sideways through upper frame slots and push clips through slots. Rotate clips to retain against the frame wall.

6. Position the harness webbing flush with back pad and at a slight angle as shown. Mark frame through webbing holes with white marker. Repeat for remaining harness.

7. Drill holes in frame using a 6mm drill bit.

8. Tap new clips in place to secure harness webbing tight against the frame. Repeat steps 5-8 for remaining harness.

9. Turn lower harness clips sideways, and insert through bottom frame slots.

10. Install harness bracket bolts and lock nuts. Tighten securely. Harness installation is now complete.
